

ScanCare

Premium Service & Maintenance

On-site service that's flexible

ScanCare on-site repair service includes spare parts, labor and travel for verified hardware failures. Available nationwide¹, ScanCare on-site service is performed by a professionally-trained, Fujitsu-authorized Field Service Engineer who knows your scanners inside and out. When your scanners need service or maintenance, you can rest assured that your important equipment is in the best hands. And we'll be ready when you need us.

Convenient maintenance, delivered

We build our scanners to last, and routine maintenance ensures that they keep performing day in and day out. When it's time for ScanCare preventative maintenance, your service engineer will schedule an on-site visit during regular business hours – at a time convenient to you – to thoroughly clean your scanner and replace any necessary consumable parts. A standard supply of consumables³ is included with ScanCare so you have one less thing to worry about.

Make everyone in your group a scanning expert

During your first preventative maintenance visit, your service engineer will offer operator training to demonstrate your scanner's features, basic operation, routine maintenance, consumables replacement, and troubleshooting.

Our most comprehensive on-site service program, complete with preventative maintenance, consumables replacement, user training, and custom service response times to fit your needs.

Our very best service program.

ScanCare protection includes:

Professional on-site service

Preventative maintenance visits

Supply of Genuine Fujitsu consumables

User training

Can be added to eligible scanners during warranty or after the warranty has expired. Available in single-year or multi-year increments.

Talk to our knowledgeable service sales team to see how ScanCare fits your organization.

ScanCare

On-site Service — On-site repair service includes spare parts, labor and travel for verified hardware failures. On-site service is performed by a Fujitsu Authorized Field Service Engineer (FAFSE), either a Fujitsu employee or pro-fessionally trained Authorized Service Provider. Service will be provided between 8 a.m. and 5 p.m. local time, Monday through Friday (excluding holidays).

On-site service outside the hours specified above may be available for rates and terms then in effect. Outside of Preventative Maintenance (PM) events, on-site visits do not include preventative maintenance, maintenance training, consumables and cleaning materials, troubleshooting of software configuration, applications, or set-up.

Preventative Maintenance — A FAFSE schedules an on-site visit to thoroughly clean and replace any necessary consumable parts from the pre-shipped ScanCare kit. Service will be provided during normal business hours at a time to be mutually agreed upon between the FAFSE and Customer within 2 weeks of initiation.

Consumables Kits — Each ScanCare maintenance program includes automatic delivery of a consumable kit to the end user site. Note: The Consumable kits provided during the contract term contains quantities of consumables required for cleaning and maintenance care of the Product based on normal use. Should Customer require additional consumables, ScanAid kits may be purchased from Fujitsu service sales or FujitsuScannerStore.com.

User Training — During the first Preventative Maintenance visit, a FAFSE will come on-site to provide Customer with operator training on routine scanner maintenance, consumables replacement, scanner features and basic scanner operation and troubleshooting.

Obtaining Service — In the event of a hardware failure, Technical Assistance Center (TAC) will assist the Customer in resolving the problem over the telephone. Customer must provide TAC with the product model number, part number, serial number and a description of the problem. Customer may be asked to run some simple, self-diagnostic tests and report the resulting status and error code messages. This will assist TAC in determining if the problem is the scanner or another component of Customer's system and if the problem can be resolved over the telephone. After TAC verifies a hardware problem, a service call will be initiated. A service technician will be dispatched to the product location to perform repair service if there are no security, safety or physical requirements that would restrict the service technician's access to the product.

Term — The term of this service offering shall be one year from the date of service purchase with activation card or receipt of signed FCPA Service Contract Quotation or Purchase Order.

Warranty — Fujitsu warrants that all services will be performed in a professional manner. See Fujitsu Service Terms and Conditions.

Services Not Covered — Service does not include the following:

- Electrical work external to the product, repair or replacement of product or increased service time required due to casualty, accident, damage, acts of God, transportation, missing parts, neglect, misuse or abuse, operator error, failure of proper management or supervision, unsuitable physical operating environment, use of supplies or accessories not approved by FCPA or its Authorized Service Provider.
- Service in connection with the installation, discontinuance or removal of the product.
- Any service and/or parts replacement resulting from fraud, tampering, misuse or the uses of counterfeit components, assemblies or modules.
- Accessories or missing parts, supplies, consumables and expendable items, or problems caused by those items identified as being the user's responsibility in the Periodic Routine Maintenance chapter of the User's Manual, nor does it cover relocation services, systems engineering services, programming, reinstallation of user operating systems or applications software, reconstruction of data, operational procedures due to any sort of failure to implement the most current software releases.
